Course Descriptions

AutoCAD 2010 Level 1

This course is designed for the new AutoCAD user who requires comprehensive training in AutoCAD. It incorporates the features, commands, and techniques for creating, editing, and printing drawings with AutoCAD.

Prerequisite: Windows Experience

AutoCAD 2010 Level 2

This course is designed for experienced AutoCAD users looking for additional training to take full advantage of the capabilities in AutoCAD 2009. It incorporates the features, commands, and techniques for becoming more productive when creating, annotating, and printing drawings with AutoCAD 2009. This course continues to build on the basic concepts of the AutoCAD 2009 Level 1 course.

Prerequisite: AutoCAD Level 1 or Equivalent

AutoCAD Map 3D 2010

This course is designed to enable new users to learn the majority of features and functions in AutoCAD Map 3D to create, manage, and analyze mapping data. Topics considered fundamental to using AutoCAD Map 3D are covered in-depth. Advanced features are covered, and depending on the need of each user, can be approached as an introduction or can be followed for a more comprehensive understanding.

Prerequisite: AutoCAD Level 1 or Equivalent

Surveyors Exchange 2010 Training Calendar

AutoCAD Civil 3D 2010 Essentials*

This hands-on, foundation-level course covers the essentials of AutoCAD Civil 3D, including how to work with point data in AutoCAD Civil 3D, create and analyze a surface, develop a site, and model roads, corridors, and pipe networks, as well as import and export data. Hands-on exercises throughout the course explore how to create 2D and 3D production drawings.

Prerequisite: Working knowledge of Land Desktop or AutoCAD

Civil 3D 2010 Styles Workshop*

Produce drawings that conform to yours or your customers standards. In this workshop you will bring in reference material and build a working set of styles to match your standards.

Prerequisites: Civil 3D Essentials or equivalent

Civil 3D 2010 Advanced Roading & Intersections*

Learn to use Civil 3D to its fullest potential. This class will teach you how to create intersections and use advanced roading techniques.

Prerequisites: Civil 3D Essentials or Equivalent

Civil 3D for Surveyors (field to finish)*

Collect points, import a field book file, set up a database, and create and adjust traverses. This class is designed specifically for surveyors and is a field to finish class. We will provide the instruments for data collection or you can bring your own.

Prerequisites: Civil 3D Essentials or Equivalent

** All Civil 3D classes are taught by Robert Gadbow, one of the best Civil 3D instructors in the world. He has been a speaker and instructor at Autodesk University and receives rave reviews from his students. Robert has worked in the civil engineering field for over 15 years.*
