AutoCAD Civil 3D Training

Robert Gadbow, one of the best Civil 3D instructors in the world, will once again be in Anchorage to guide you through the latest and greatest in AutoCAD Civil 3D.

Robert has been a speaker and instructor at Autodesk University and receives rave reviews from his students. He has worked in the civil engineering field for over 15 years as a drafter, technician, designer, trainer, and support technician. One student says Robert is like a drill instructor: he makes you repeat the exercises several times, making sure you really know the application.

Class Name / Topic	Dates Available	Schedule	Cost
<input type="checkbox"/> Intro to Civil 3D	Sept. 20th-22nd	8:30 AM - 4:30 PM	\$990.00
<input type="checkbox"/> Intro to Civil 3D	Sept. 27th-29th	8:30 AM - 4:30 PM	\$990.00
<input type="checkbox"/> Styles Creation in C3D	Sept. 23rd	8:30 AM - 4:30 PM	\$330.00
<input type="checkbox"/> Surveying: Field to Finish in C3D	Sept. 24th	8:30 AM - 4:30 PM	\$330.00

AutoCAD Civil 3D 2011 – Intro to Civil 3D

This is a hands on class that exposes students to the features of Civil 3D. The course takes students from the start of a project through to the end. Starting off by bringing in points and from there they are taken through a design where they build an existing surface then design a road. Once the road is designed they will produce cross sections and volumes. Finishing off the training will be pipe design and some basic grading.

Topics include: *Points, Surfaces, Parcels, Alignments, Profiles, Assemblies, Corridors, Pipes and Grading.*

Prerequisite: *Anyone that's enthusiastic about learning Civil 3D.*

AutoCAD Civil 3D 2011 – Styles Creation in Civil 3D

This 1 day class is designed to get users familiar with the different types of styles in Civil 3D. There are 3 types of styles in Civil 3D Object, Label and Table styles. Each type is covered in-depth so user will feel confident in the ability to create and edit the different styles. **Topics include:** *Object Styles, Label Styles, Table Styles and Drawing Settings.* **Prerequisite:** *Familiarity of Civil 3D.*

AutoCAD Civil 3D 2011 – Surveying: Field to Finish in Civil 3D This 1 day class is designed to get users familiar with the survey Features of Civil 3D 2011. Users are taught how to pick up data in the field so line work and symbols will automatically be drawn when the data is imported into Civil 3D. Besides importing the data users will learn how to manage their data. **Topics include:** *Description Keys, Survey Figures, Importing Fieldbooks, Database, Networks, and Traverse Adjustments.* **Prerequisite:** *Intro to Civil 3D or relevant experience.*

The classes are held in Anchorage at the Surveyors Exchange Training center, located on the 2nd floor at 3630 Springer Street. Please register early as these classes fill up quickly. You may register by faxing this form to 907.561.6515. To receive more information please contact Chris at 907.561.6501 x225 or e-mail him at chris@tse-ak.com.
